Fernald, Ohio 45030

Re: Notice of Noncompliance
Westinghouse Materials Co., of Ohio

Dear Mr. Westerbeck:

On August 20, 1991, a representative of the United States Environmental Protection Agency (U.S. EPA) conducted an inspection of Westinghouse Feed Materials Production Center to determine compliance with the polychlorinated biphenyl (PCB) regulations set forth in the Code of Federal Regulations, 40 C.F.R. Part 761.

During that inspection, the inspector observed that the annual report and current inventory reflected a large number of PCB containing drums in storage for disposal in excess of one year. This is a violation of 40 CFR 761.65(a) which stipulates that any PCB article or container stored for disposal after January 1, 1983 shall be removed and disposed of within one year from the date it was first placed into storage for disposal.

Within 30 days of receipt of this Notice of Noncompliance, Westinghouse Feed Materials Production Center must submit manifests to document that this violation has been corrected. That documentation must be submitted to:

Tony Silvasi
PCB Control Section (SP-14J)
U.S. Environmental Protection Agency
230 South Dearborn
Chicago, Illinois 60604
